

water star
WISCONSIN

guiding, inspiring and recognizing municipalities for exemplary efforts in
surface water groundwater recreation

Is Your Municipality a Water Star?

Find out at the

Wisconsin Water Star Workshop

sponsored by the Wisconsin Coastal Management Program

Friday September 17, 2010, 12:30 - 3:30 pm at UW-Milwaukee

School of Architecture & Urban Planning Computer Lab Rm 158

2131 E. Hartford Ave. Parking at the Union on Kenwood Blvd (\$5 for 4 hours)

Who should attend?

Staff from municipalities who are demonstrating a strong initiative to strengthen stormwater controls, ensure water quality, protect habitats, encourage residents to conserve water and implement other actions protecting surface water and groundwater. Your consultants should also be encouraged to attend.

Agenda

- 12:30 - 1:00 Overview of Water Star, explanation of the municipal profile, application and website.
- 1:00 - 3:30 Participating staff will use this time to complete the online Water Star application with the help of the Water Star coordinator. We strongly recommend municipal staff from at least two departments, and with a detailed understanding of municipal policies, regulations and incentives, participate. You can fill in the on-line application to become a Water Star Community without attending the workshop. However, people who attend the workshop find the additional help and assistance to be invaluable in completing the extensive application.

Are you a bronze, silver or gold Water Star Community?

Water Star is a reason for celebration: here the Village of Mukwonago administrator, the county executive, state senator and other elected officials receive their Water Star award along the Mukwonago River.

Wisconsin Water Star

A new state program launched on April 22, 2010 to guide, inspire and recognize municipalities who are doing exemplary work in all areas of municipal life including stormwater management, public works, parks & public lands, wastewater treatment, public water supply, community education, business incentives and emergency management.

To register, or for more information, contact
Water Star Coordinator Suzanne Wade at
suzanne.wade@ces.uwex.edu or 920-674-8972.

A map and other information will be sent to registrants.
